

- **Short Range PAL or NTSC Analogue Colour Video Transmitter**
- **C-Band 4400 – 4900MHz (In 1Mhz Steps)**
- **FM Modulation**
- **Built in Antenna**
- **Internal Camera / External BNC**
- **Sealed to IP65**
- **Internal Rechargeable Battery**
- **Rugged & Compact**
- **Built in Heater Pad**
- **Operating Temperature -50°C – 60°C**

The 7011-VT is a compact analogue RF video transmitter operating on the C Band frequency with L-Band and S-Band options. It can transmit PAL or NTSC video over a short range on RVT frequencies, such as ROVER and Strikehawk. An optional external antenna can be attached via a SMA connector to increase the range.

The units can either operate using it's built in camera or by an external video input via the BNC. This is configurable using the front panels switch.

With its rugged aluminium case and seals the 7011-VT meets and exceeds IP65 specification.

*Frequency Options:*

*Lower L-Band: 1435 – 1535MHz*

*Upper L-Band 1700 – 1850MHz*

*S Band: 2200 – 2399MHz*
